

# **Southeast Region Federal Construction**

**“Light” Virtual: October 27-28**

# **2021 SUMMIT**

**In-Person: April 6-7**

# **2022 SUMMIT**

**Infrastructure & Environmental Summit**

**Virginia North Carolina South Carolina Georgia Florida**

Considering the current COVID operational environment, anticipated government travel restrictions and the commitment of all co-hosts to provide a valuable, impactful and safe event, we are postponing the in-person Southeast Region Federal Construction Infrastructure & Environmental Summit until April 6-7, 2022 in Wilmington, North Carolina.

We are as disappointed in this decision as everyone who will read this message, but ultimately, we feel it is the best decision given the current environment and trending figures.

Although we cannot gather in-person for the Summit in 2021, we hope that you will participate in a virtual, “Summit-Light” web conference, scheduled for October 27-28, 2021.
